PROGRESS REPORT

PROGRAMS DIVISION

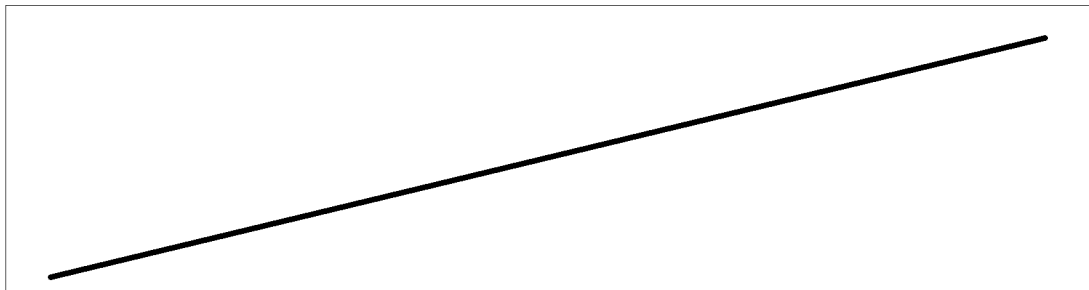

Apart from what I presume to be routine --- such as trying to keep the professors happy and handling about ten inquiries from various offices on technical and area training opportunities for employees --- the only noteworthy progress has been conduct of, and favorable reaction to the first of three seminars on the USSR initiated this week.

I made one visit to the External Research Staff  and STAT attended one conference at the Southeast Asia Seminar at State (to which I hope to return late this afternoon).
